The image shows the Parallels Desktop 7 for Mac splash screen. At the top, it says "Parallels Virtual Machines". Below that is an icon of a computer monitor displaying a Windows logo, with two vertical red bars in front of it. The main heading is "Welcome to Parallels Desktop 7" in large white text, followed by "Top new features in Parallels Desktop 7 for Mac" in smaller white text. There are four feature cards arranged horizontally. Each card has an icon at the top, a title in blue text, and a description in white text. The first card has a lion's head icon and is titled "Mac OS X Lion", listing features like Launchpad and Mission Control. The second card has a blue rocket icon and is titled "Speed up your machine", mentioning performance improvements and battery life. The third card has a camera icon and is titled "More applications", discussing iSight and FaceTime HD support. The fourth card has an icon of a laptop, tablet, and phone, titled "Mobile Parallels", highlighting audio support and mobile device access. At the bottom left is a link "All new features in Parallels Desktop" and at the bottom right is a "Launch Parallels" button. There are also three small grey circles in the center of the bottom row, with the middle one being white.

Best of all, the majority of the install process is completely unattended, so you can just set it and forget it.. You can go from not

having Windows, to having a Windows 10 installation in just a few clicks.. I have just downloaded Ubuntu onto my mac using parallels The only issue is that the Ubuntu window is about an inch too small each side.. Most notably, it also officially supports macOS High Sierra One of my favorite new features is the new Picture-in-Picture mode, which allows you to keep a virtual instance on screen at all times.. You can now with a tried an true Windows Boot camp installation, a Windows To Go install, or one of the many virtualization options available. 0041d406d9 [Fergie For Mac](#)
